

ROV Cost Analysis

Detailed breakdown for Egypt market

Cost Overview

The total cost for the ROV components is **29,000 EGP** and **580 USD**, ensuring a competitive pricing strategy for the Egyptian market in robotics applications.

Component Breakdown

Major categories include Propulsion, Electronics, Cameras, Mechanical, Tether, and Manipulator, which together contribute to the effective performance of the ROV in various underwater tasks.

Market Adaptability

This cost analysis reflects **local market conditions** and allows for strategic adjustments to pricing, ensuring that our ROV remains accessible and appealing to potential clients in Egypt.

 Component breakdown · Prototype grade

 Exchange reference: 1 USD ≈ 50 EGP (indicative)

CATEGORY / COMPONENT	COMPONENTS DETAILS	COST (EGP)	COST (USD)
 Propulsion	6 Bilge Pumps, Propellers, Nozzles	EGP 6,540	USD 130
 Electronics	Arduino, Drivers, IMU, PCB	EGP 6,320	USD 126
 Cameras	3 Hikvision Cameras + Accessories	EGP 3,100	USD 62
 Mechanical	Frame, Acrylic, Aluminum	EGP 6,500	USD 130
 Tether	Power Cable, Ethernet, Pneumatic Hose	EGP 3,580	USD 72
 Manipulator	Pneumatic System + Motor	EGP 3,100	USD 62
